

Seership Sessions with Anastacia

My Seership Work The gift of seeing into the Otherworld comes through the women in my Mother's family. As an ancestral seer, I have been offering readings to clients since 1995; endeavoring to provide each client with clear and practical information that strengthens their own intuition as well as their trust in the unseen worlds. Please note, in many ways, your reading begins as soon as you have made your appointment, meaning, once we establish your session time things begin to open out and progress. So keep a journal, watch your dreams and pay attention during the days prior to your session.

The Sessions Each session ranges between 50-80 minutes. Initial spiritual work is performed 20 min. prior to our coming together as well, so please be mindful of this. I will contact you very close to our appointed time to begin our work together. During the sessions I work with the Inner Contacts within my own lineage, as well as the counsel of beings working with and through you. At some point in each session I perform a cross-check of the information using my personal Tarot oracle; thus ensuring accuracy in interpretation of the "raw" seership information. To assist you in your integration of the information, the sessions progress at your pace, not mine; so please keep me informed as to your needs for pauses, repeated information and the like.

Due to some reader's reliance upon vague language and general terminology, people seeking spiritual guidance can leave an intuitive session more confused than before. I work in a different manner. We will begin at the mythic/spiritual level and then gently and thoroughly work our way toward clear and practical next steps. As such, my readings will often conclude with specific personal rituals, homework, supplement recommendations and outside referrals to do on your own. These suggestions are very powerful and I highly recommend you do them!

Preparation on Your Part The sessions begin with a general look/assessment of your life and situation as it stands currently. This generally takes 20-30 minutes; afterwards, you are free to ask any remaining unanswered questions you have. Please make a list of questions in advance as the pressure of remembering everything you want to ask can be strenuous for you during your reading. Please also go light on any stimulating substances prior to our work as it charges your nervous system and presents some difficulty for me in my work.
